

# The CO<sub>2</sub> Hoax

Those that do not read history are destined to repeat history.

## Salem Witches

The Salem witch trials and executions came about as the result of a combination of church politics, family feuds, and hysterical children, all of which unfolded in a vacuum of **political authority**.

The earth is flat or the sun rotates around the earth

**Chicken Little** believes the sky is falling when an acorn falls on his head. Chicken Little decides to tell the king and, on his journey he meets other animals which join in the quest.

**The Sky is Falling:** The evidence is clear: the time for action is now. By 2030 almost all countries will experience “extreme weather and the ice caps will be melting. The sea level will rise putting millions of people around the world in peril.

**What are the facts!**

**Everyone can agree on two things:**

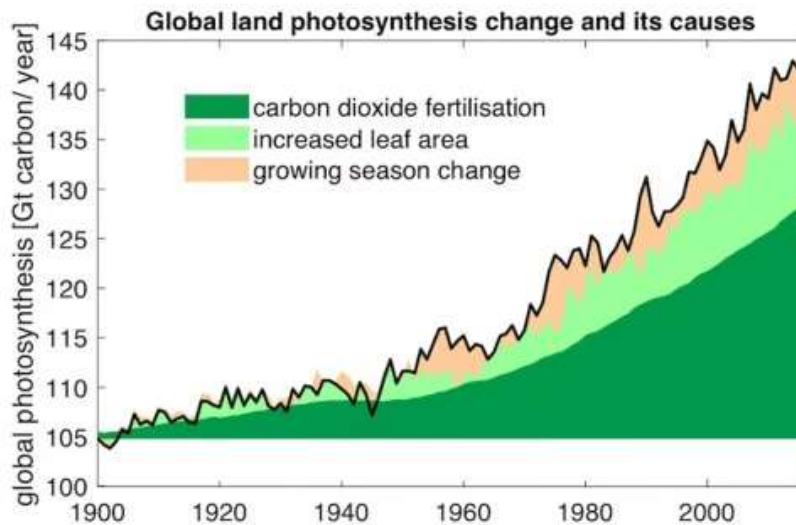

1. The climate is changing
2. CO<sub>2</sub> in the atmosphere is increasing

## What everyone cannot agree on:

1. CO<sub>2</sub> is a pollutant
2. CO<sub>2</sub> is not a pollutant. If there was no CO<sub>2</sub> in the atmosphere all plant life would die and therefore no animals and we would not exist.

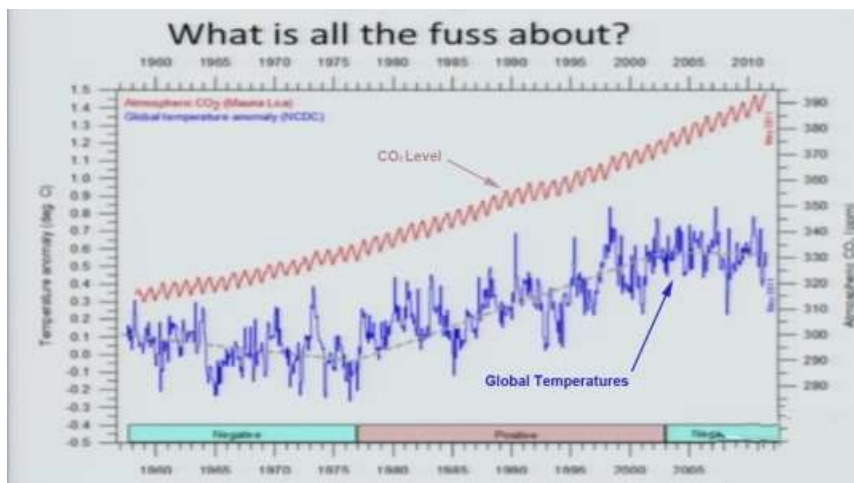

## We are at a point of no return for the planet

1. Doubling of CO<sub>2</sub> will cause the extinction of species, the ice caps to melt and the rise of the oceans, threatening millions of people around the world.
2. Doubling of CO<sub>2</sub> will cause the greening of the earth, enabling the feeding of a growing earth's population. In the past CO<sub>2</sub> levels were higher than they are today.

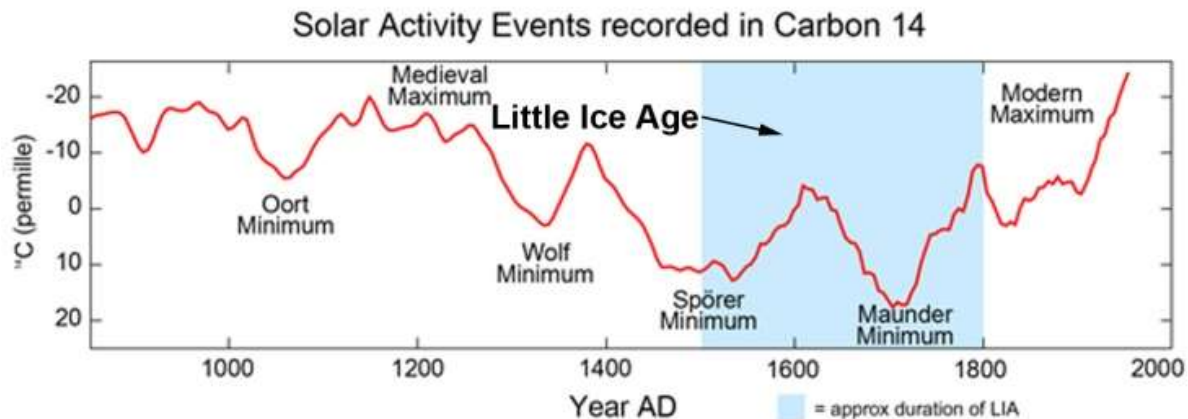

## The earth's temperature is rising

1. Temperature sensors around the world have shown a marked increase that directly corresponds to the increase in CO<sub>2</sub> since 1970.
2. The majority of sensor locations are in urban and populated areas, which normally shows a rise in temperature over ambient earth temperatures. When these sensors are not included, there is no rise in the historical average of earth's temperature. In fact Global temperatures are going down even with the rise of CO<sub>2</sub>.

## We must stop using fossil fuels

1. The burning of fossil fuels are the main source of the increase in CO<sub>2</sub> and the prime cause of climate change.
2. The prime cause of climate change is the sun, submarine volcanism and water vapor (clouds) which are not clearly understood or modeled and therefore ignored. CO<sub>2</sub> is a minor contributor.

Seventy percent of the earth's surface is covered by water. Ocean currents act much like a conveyer belt, transporting warm water and precipitation from the equator toward the poles and cold water from the poles back to the tropics. Thus, currents regulate global climate.

A more plausible cause of climate change is from the more than 5,000 submarine volcanos on the ocean floor caused by the continually distorted earth's crust due to a varying gravitational field. Volcanos are the biggest source of greenhouse gasses. Submarine volcanism is able to and causes a significant element of global climate change capable of initiating and driving the sudden interglacial warmings of the ice age cycles

driven by orbital forcing.

The atmosphere is primarily an effect of dominant solar radiation, gravitational pressure and the much smaller heat input of internal heat. The total global effect of the heat from submarine volcanic activity in the global surface is neither insignificant nor constant.

**The majority of scientists agree that the increase in CO<sub>2</sub> in the atmosphere is the cause of climate change. Wrong**

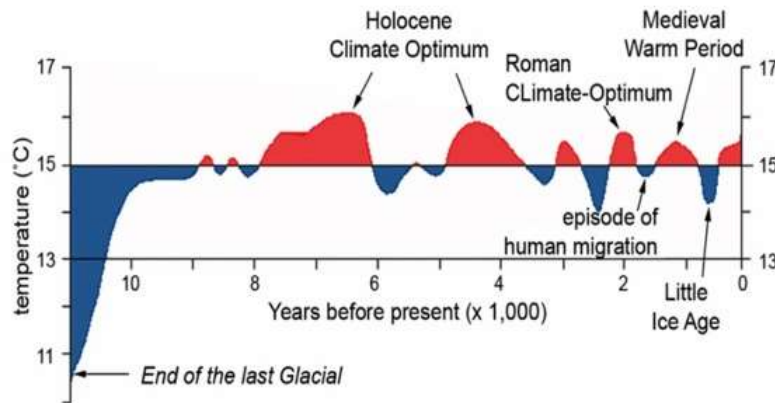

There is a growing body of scientists that do not agree with this statement. They have been suppressed by the political elite which control the funding of grants and research. If you do not preach the narrative they are ostracized, receive no funding and forced to resign.

These political elite are determined see the demise of Capitalism and are using the CO<sub>2</sub> Hoax to lead the nation and the world towards democratic socialism. In order to do this they

have to destroy Capitalism. What better way than to eliminate the one hinge pin that capitalism is based upon, hydrocarbons. In Europe today there are democratic socialist mass parties that are also working to eliminate the use of hydrocarbons.

## Climate swings of past 12,000 years

Northern Hemispheric temperature reconstruction for the past 10,000+ years

They base this false premise of CO<sub>2</sub> as the cause of global warming by looking at only a short period of the earth's history, 100 years or so. A longer picture of the earth history paints a total different picture. In fact many are now thinking that we are starting into a cooling period even with an increasing level of CO<sub>2</sub>.

Once again these political elitist take a short period of earth's history to justify the CO<sub>2</sub> hoax by showing the melting of the glaciers but in fact the earth has gone through many cycles before man ever appeared on earth with higher CO<sub>2</sub> levels.

**Yes, we all want a clean environment, but we also want transparency and truth in getting there.**
